

New Research Opportunity

The Exercise Neuroscience Research Laboratory and MS Center at the University of Illinois invites you to participate in a voluntary study of physical activity and function in older adults with multiple sclerosis.

What will I do?

- You will come in for 1 testing session and go through various functional assessments including walking, cognition, balance, and physical activity.

Why is this research important?

- Very little is known about functional changes and physical activity in older adults with MS.

What's in it for me?

- You will be helping others by contributing to ongoing MS research.

Will I be compensated for my time?

- Yes! You will receive \$75 for participation.

Eligibility

- Diagnosis of multiple sclerosis
- Ambulatory with or without assistance
- ≥60 years of age
